Education

VIT Bhopal University

Master of Computer Applications (MCA)

2026 – 2028

Bhopal, Madhya Pradesh

Eminent College of Management and Technology

Bachelor of Computer Applications — CGPA: 8.6/10.0

2023 – 2026

Kolkata, West Bengal

Experience

Stadia

April 2026 – June 2026

Full Stack Developer Intern

[Certificate]

- Owned end-to-end delivery of product features across the stack, from requirement analysis to deployment
- Built responsive interfaces with **React.js**, reducing page load time by **30%**
- Designed scalable REST APIs using **FastAPI** and integrated **MongoDB** to manage **10k+ records**
- Added payment gateway integration, **WebSocket**-based real-time features, and webhook event handling
- Implemented automated test workflows with **Playwright**, cutting manual testing effort by **50%** and improving release reliability
- Managed production deployments on **DigitalOcean** and collaborated through Git-based code review workflows

GirlScript Summer of Code (GSSoC)

Oct. 2024 – Nov. 2024

Open Source Contributor

[Certificate]

- Contributed to multiple open-source projects, fixing **10+ bugs** and improving code efficiency by **15%**
- Engineered frontend components in **JavaScript** and **React**, collaborating with maintainers via GitHub
- Merged **5+ pull requests** across repositories; earned the Explorer Badge and Git Explorer Level 1 Badge

Skills

Languages Java, Python, C++, JavaScript, TypeScript

Frontend React.js, Tailwind CSS, HTML, CSS

Backend Spring Boot, Spring AI, FastAPI, Hibernate, Microservices, REST APIs, OAuth2

Databases PostgreSQL, MySQL, MongoDB, Redis, Pinecone (Vector DB)

DevOps & Tools Docker, GitHub Actions, AWS, DigitalOcean, Kafka, Playwright, Git

Projects

VibeWall – Anonymous Confession & Discussion Platform

[GitHub] [Live]

- Built a scalable RESTful API backend with **Spring Boot**, **MongoDB**, and **Redis** caching, reducing average API response latency by **50%** under concurrent load
- Implemented **JWT**-based authentication with access/refresh token rotation, role-based access control (RBAC), and secure session management
- Integrated a **Generative AI (LLM)**-powered content moderation pipeline to automatically detect and flag unsafe content in real time, cutting manual moderation effort by **60%**
- Secured user data with server-side encryption and password hashing; containerized the application with **Docker** for scalable, repeatable deployment
- Tech Stack:* Spring Boot, MongoDB, Redis, JWT, Generative AI / LLM, REST APIs, Server-Side Encryption, Docker

AI-Powered Study Resource Generator

[GitHub] [Live]

- Built a **Generative AI**-powered Spring Boot platform that auto-generates study notes, practice tests, and MCQs using Large Language Models (LLMs)
- Integrated an LLM via **Spring AI** with a vector database for semantic search, reducing redundant AI generation calls by **40%** and cutting response latency by **50%**
- Implemented vector embeddings with cosine-similarity-based semantic search to intelligently reuse previously generated study content
- Automated recurring reminders and test delivery pipelines using job scheduling and email automation, secured with **OAuth2** authentication
- Deployed and hosted the platform on **AWS (EC2)** for scalable, production-ready delivery
- Tech Stack:* Spring Boot, Spring AI, Generative AI / LLM, Vector Database, Semantic Search, OAuth2, AWS, REST APIs

Achievements

- Hackathons:** Participated in Hack4Bengal and Smart India Hackathon (SIH) – [View Certificates](#)
- LeetCode:** Solved 300+ problems and earned the Knight Badge – [View Profile](#)
- Hacktoberfest 2024:** Contributed 5+ merged pull requests and earned the official Hacktoberfest badge – [View Merged PRs](#)
- Certifications:** Spring Boot, Java, React.js, and Tailwind CSS coursework (Telusko, Udemy) – [View Certificates](#)
