SKILLS SUMMARY

Programming Languages: Java, Python, C++, JavaScript, TypeScript
Frontend: React.js, Tailwind CSS, HTML, CSS
Backend: Spring Boot, FastAPI, Hibernate, Microservices
Database: PostgreSQL, MySQL, MongoDB, Redis
DevOps & Tools: GitHub, Docker, AWS, DigitalOcean, Playwright

EXPERIENCE

- Stadia [Experience Letter]** Remote
Full Stack Developer Intern Apr 2026 – Jun 2026
 - Full Stack Development:** Developed production-ready features using **React.js**, **FastAPI**, and **MongoDB** for client-facing applications.
 - Backend & APIs:** Built scalable REST APIs, optimized MongoDB queries, and integrated frontend services with backend systems.
 - Testing & Deployment:** Automated end-to-end testing using **Playwright** and deployed applications on **DigitalOcean** using GitHub workflows.
 - Collaboration:** Worked in Agile teams, participated in code reviews, bug fixing, and feature implementation while maintaining clean, production-quality code.
- GirlScript Summer of Code** Remote
Open Source Contributor Oct 2024 – Nov 2024
 - Open Source:** Contributed to open-source projects by fixing bugs, developing React components, and collaborating through GitHub.
 - Achievements:** Merged 5+ pull requests, participated in code reviews, and earned the Explorer Badge and Git Explorer Level 1 Badge.
 - Certificates:** [GirlScript Certificates](#)

PROJECTS

AI-Powered Study Resource Generator [GitHub]:

- Developed a scalable backend application using **Spring Boot** to generate AI-powered study notes, practice papers, and quizzes through secure RESTful APIs.
- Designed and implemented secure authentication and authorization using **Spring Security** and **OAuth2** for protected API access.
- Optimized content retrieval using **semantic search** and vector embeddings, improving response time by reducing redundant AI processing.
- Automated recurring tasks and email notifications using **Spring Scheduler** and **JavaMailSender** for scheduled content delivery.
- Built a modular backend architecture using **PostgreSQL**, **JPA/Hibernate**, and **Docker**, following clean code and scalable design principles.
- Tech Stack:** Java 17, Spring Boot, Spring Security, Spring AI, PostgreSQL, JPA/Hibernate, REST APIs, OAuth2, Docker, Git

VibeWall Anonymous Confession & Discussion Platform [GitHub] [Live]:

- Developed a scalable anonymous discussion backend using **Spring Boot**, **MongoDB**, and **Redis** with secure REST API architecture.
- Implemented **JWT authentication** with access and refresh token flow, role-based access control, and secure session management.
- Integrated **NVIDIA NIM (Llama 3.1)** AI moderation pipeline to automatically detect unsafe content before database storage.
- Secured user data using **AES-GCM 256-bit encryption** and **BCrypt** password hashing for production-grade security.
- Tech Stack:** Spring Boot, Java 17, MongoDB, Redis, JWT, Docker, NVIDIA NIM API

EDUCATION

- Vellore Institute of Technology (VIT)** 2026 – 2028
Master of Computer Applications (MCA)
- Eminent College of Management and Technology** 2023 – 2026
Bachelor of Computer Applications (CGPA: 8.6/10.0)

ACHIEVEMENTS

Hackathons: Participated in Hack4Bengal and Smart India Hackathon (SIH).
[View Certificates](#)
LeetCode: Solved 300+ problems and earned the Knight Badge.
[LeetCode Profile](#)
Hacktoberfest 2024: Contributed 5+ merged pull requests and earned the official Hacktoberfest badge.
[Merged PRs](#)
Courses & Certifications: Completed Spring Boot and Java courses from Telusko and Udemy while learning React.js and Tailwind CSS.
